CSCE 5933.001 Spring 2010: Parberry

Student Comment 1

Course Content: For this course the content was very sporadic. Students were meant to provide most of the content based upon what they learned and studied.

Course Structure: Very discussion based. Students were the main providers of information

Own Performance: Didn’t really know what to research at first... But I can put it together in a good presentation.

Student Comment 2

Exams: N/A

Course Content: Students determined the course content, and by definition the material is relevant and interesting.

Instructor: Dr Parberry is a great instructor.

Course Structure: I like seeing what everyone decides to work on.

Own Performance: I’ve done great.
